

BOGDAN STEFANOV

AI Developer — Agentic Systems & Automation

Sofia, Bulgaria | +359 877 772 253 | bogdan.mstefanov@gmail.com | linkedin.com/in/bogdan-stefanov-2032802b0 | github.com/randomZname

SUMMARY

AI Developer building agentic systems and automations end-to-end: LLM agents with tool use, RAG pipelines, multi-provider model routing, and full-stack SaaS products (Python, TypeScript, Next.js). Founder of a math education business operating across multiple locations, with prior experience in credit consulting and financial sales — combining hands-on engineering with real business operations, sales, and team leadership. BSc Information Systems student at Sofia University (FMI).

TECHNICAL SKILLS

AI & Agents: LLM agents, tool use / function calling, Pydantic AI, LiteLLM (multi-provider model routing), Anthropic Claude API, RAG (PostgreSQL pgvector, hybrid vector + trigram search), embeddings, prompt engineering, agent evaluation (evals), Whisper speech-to-text, LLM safety (prompt-injection mitigation, tiered tool permissions, human-approval queues)

Automation: Playwright browser automation & scraping, Telegram Bot API, Google Calendar API, Gmail API, n8n workflows, scheduled monitors & alerting

Languages: Python, TypeScript, JavaScript, SQL, C#, C++

Backend: FastAPI, PostgreSQL, SQLAlchemy, Alembic, Prisma, REST APIs, Docker, Docker Compose, pytest

Frontend: Next.js (App Router), React, Tailwind CSS

Other: Stripe payments, fal.ai media pipelines, Git/GitHub, Linux/CLI

PROJECTS

BogiAgent — Personal AI Agent ("Life OS") · Python

github.com/randomZname/life-os

- Designed and built a personal AI agent (~13,000 lines of Python across 100 files) with 25+ tool modules — university portal scraping, calendar, email drafting, finances, habits, contacts CRM, web search, voice, file management — accessible via Telegram bot, CLI, and a FastAPI web dashboard.
- Implemented hybrid RAG over university course materials: PDF/DOCX/PPTX ingestion, chunking, pgvector embeddings combined with trigram search in PostgreSQL.
- Built a long-term memory system with namespaced memories, ranked recall, deduplication, and an automatic post-conversation memory pipeline.
- Engineered a safety-first architecture: tiered tool permissions, human approval queue for all external writes, untrusted-content wrapping against prompt injection, and a sandboxed code runner (no network access, timeouts).
- Provider-agnostic model routing via LiteLLM aliases (cheap/smart/premium tiers); evaluation framework for RAG quality and agent scenarios; 29 test files; Docker Compose and Alembic migrations.

Lumora — AI Video Generation SaaS · TypeScript

lumora-delta-lyart.vercel.app

- Built an AI motion studio that turns images and text prompts into 5–10s cinematic video clips in about 30 seconds, with multiple visual style presets and unlimited regeneration.
- Next.js 14, Prisma, fal.ai video-model pipeline, Stripe subscriptions with free and paid tiers.

AlterMed — Multilingual Clinic Website · TypeScript

altermed-bay.vercel.app

- Production website for a medical practice: multilingual (EN/BG), service catalog, structured booking flow with payment integration.
- Next.js 16, Tailwind CSS v4, internationalization, image optimization, SEO.

EXPERIENCE

Founder & Mathematics Teacher · Private math tutoring school, Sofia Aug 2024 – Present

- Founded and run a tutoring school operating across multiple locations; recruited and manage a team of teachers.
- Own scheduling and allocation of teachers and students across locations; teach mathematics personally.
- Run the business end-to-end: sales, pricing, parent communication, and finances.

Credit Consultant · Sofia Mar 2024 – Jun 2025

- Advised individual clients on mortgage and consumer lending; matched financing options to client profiles across partner banks and managed applications end-to-end.

Business Consultant (Financial Products) & Sales Team Leader · Lyconet Jun 2023 – Sep 2023

- Sold financial products and led a network-marketing sales team: recruitment, training, and performance coaching.

EDUCATION

BSc Information Systems · Sofia University "St. Kliment Ohridski", Faculty of Mathematics and Informatics (FMI) 2024 – 2028 (expected)

Sofia High School of Mathematics (SMG) · profile: Mathematics, Informatics, Physics 2018 – 2023

Professional Qualification "Junior Developer" — National Program IT Career · Technology School Electronic Systems (TUES), Technical University of Sofia — OOP, algorithms, data structures 2020 – 2023

Certificate in Corporate Management · Institute for Postgraduate Studies, University of National and World Economy (UNWE), Sofia completed 2023

LANGUAGES

Bulgarian (native) · English (C1 — IELTS 7.0)
